

Down and Dirty

Cub Scout Nova Award Workbook

This workbook can help you but you still need to read the Cub Scout Nova Awards Guidebook.

This Workbook can help you organize your thoughts as you prepare to meet with your counselor.

You still must satisfy your counselor that you can demonstrate each skill and have learned the information.

You should use the work space provided for each requirement to keep track of which requirements have been completed, and to make notes for discussing the item with your counselor, not for providing full and complete answers.

If a requirement says that you must take an action using words such as "discuss", "show", "tell", "explain", "demonstrate", "identify", etc, that is what you must do.

Counselors may not require the use of this or any similar workbooks.

No one may add or subtract from the official requirements found in the Cub Scout Nova Awards Guidebook (Pub. 34032 – SKU 614935).

The requirements were issued in 2017 • This workbook was updated in August 2017.

Scout's Name: _____ Unit: _____

Counselor's Name: _____ Counselor's Phone No.: _____

This module is designed to help you explore how earth science affects your life

1. Choose A or B or C and complete ALL the requirements.
- A. Watch an episode or episodes (about one hour total) of a show about Earth, the weather, geology, volcanoes, or oceanography.

What was watched?	Date	Start Time	Duration

Some examples include—but are not limited to—shows found on PBS ("NOVA"), Discovery Channel, Science Channel, National Geographic Channel, TED Talks (online videos), and the History Channel. You may choose to watch a live performance or movie at a planetarium or science museum instead of watching a media production. You may watch online productions with your counselor's approval and under your parent's supervision.

Then do the following:

1. Make a list of at least two questions or ideas from what you watched.

1.	
2.	

Workbook © Copyright 2017 - U.S. Scouting Service Project, Inc. - All Rights Reserved
Requirements © Copyright, Boy Scouts of America (Used with permission.)

This workbook may be reproduced and used locally by Scouts and Scouters for purposes consistent with the programs of the Boy Scouts of America (BSA), the World Organization of the Scout Movement (WOSM) or other Scouting and Guiding Organizations. However it may NOT be used or reproduced for electronic redistribution or for commercial or other non-Scouting purposes without the express permission of the U. S. Scouting Service Project, Inc. (USSSP).

5. Share your model and what you have learned with your counselor.

- B. Rock on.

1. What minerals are common in your state? How they are used.

Mineral	Used

- Make a collection of three to five common minerals and explain

	Mineral	Explanation
1.		
2.		
3.		
4.		
5.		

2. Are these minerals found in sedimentary, igneous, or metamorphic rocks?

	Mineral	Type of rock
1.		
2.		
3.		
4.		
5.		

- 3. Explain or demonstrate the difference in formation of the three major types of rocks.

Sedimentary	
Igneous	
Metamorphic	

- Which types of rocks are common in your area?

- 4. Share your collection and what you have learned with your counselor.

- C. Weather changes our world

- 1. Make three weather instruments out of materials around your home. (Examples include a rain gauge, weather vane, barometer, anemometer, and weather journal.)

1.	
2.	
3.	

- Use these and another method that is readily available (i.e., thermometer, eyes, older person's joints, etc.) for a total of four methods to monitor and predict the weather for one week. Keep a log of your findings.

(A sample page for recording the predictions and results may be found at the end of this workbook.)

- Which instrument provided the most accurate information?

- 2. Keep a weather journal for a week. Include your predictions and the predictions of a local meteorologist.
(A sample Journal page for recording the predictions and results may be found at the end of this workbook.)
Do your predictions match those of the local meteorologist?

Do your predictions match the weather that occurred?

How can the predictions become more accurate?

- 3. Discuss your work with your counselor.

- D. Animal habitats: Choose TWO of the following animal habitats and complete the activity and questions. At least one habitat should be close to your home (within 50 miles). Visit at least one of the habitats. Once you have completed the activity and questions, discuss the habitats and the activities with your counselor:

- 1. Prairie

- Draw or model a food web with at least five consumers and two producers that live in the prairie habitat.

- What is the difference between consumers and producers? Predators and prey?

What would happen if one of the animals in the food web disappeared?

2. Temperate forest

Research the two main categories of trees in the temperate forest (coniferous and deciduous).

Why are their leaves different?

How are their seeds different?

Put a twig from a coniferous tree (cone-bearing tree with needles) in a cup of water and tightly fasten a clear plastic bag around the needles. Put a twig from a deciduous tree (leafy tree that loses its leaves in the fall) in a cup of water and tightly fasten a clear plastic bag around the leaves. Observe what happens and draw pictures of your observations.

--	--

Think of an explanation for what occurred and discuss your explanation with your counselor

3. Aquatic ecosystem

With a parent's permission and guidance, visit an aquatic habitat near your home. Examples include a stream, river, lake, pond, ocean, and wetland (a marsh or swamp).

Draw or photograph the area.

What are the most common types of plants growing there?

What animals did you see?

Did you see, hear, or smell any evidence of other animals? (Your evidence might include things like bird calls, splashes of fish or frogs jumping, tracks, feathers, or bones.)

How do aquatic ecosystems affect your life?

How have humans affected the ecosystem? (Look for signs of humans such as trash and bridges or walkways.)

How do you think humans have affected the ecosystem in ways you cannot see? (Think about fertilizer and pesticides washing off your lawn and flowing into a stream.)

How would this affect creatures that live in the water?)

5. Desert

Choose a desert animal or plant. _____

Make a model of it, draw it, or describe it.

Explain how it is particularly well adapted to survive in a place where there is very little water.

How would the desert be different if this plant or animal were not there?

6. Polar ice

Research an animal that can be found in the polar ice habitat. _____

Draw or make a model of the animal

and name three characteristics that make it well adapted for life in the very cold and snowy environment.

1.	
2.	
3.	

7. Tide pools

Explain how a tide pool is formed and describe several animals that are found in tide pools.

Make a model or draw a diagram of a tide pool at a high intertidal zone and a low intertidal zone.

Include animals found in tide pools and explain how they adapt to their constantly changing environment.

4. Visit. Choose A or B and complete ALL the requirements.

A. Visit a place where earth science is being done, used, explained, or investigated, such as one of the following: cave, quarry or mine, geology museum or the gem or geology section of a museum, gem and mineral show, university geology department, TV or radio station meteorology department, weather station, volcano or volcano research station, or any other location where earth science is being done, used, explained, or investigated.

1. During your visit, talk to someone in charge about how people at the site use or investigate a particular area of science. How could this investigation make the world better?

2. Discuss with your counselor the science being done, used, explained, or investigated at the place you visited.

B. Explore a career associated with earth science.

Find out what subjects you would need to study as you get older.

What kind of education would you need in the future to help explore Earth?

What types of people other than geologists explore Earth?

Discuss with your counselor what is needed to have a career in earth science.

When working on Nova and Supernova awards, Scouts and Scouters should be aware of some vital information in the current edition of the *Guide to Advancement* (BSA publication 33088). Important excerpts from that publication can be downloaded from <http://usscouts.org/advance/docs/GTA-Excerpts-nova.pdf>. You can download a complete copy of the *Guide to Advancement* from <http://www.scouting.org/filestore/pdf/33088.pdf>.

Weather Prediction Methods (Requirement 3C1)

Date	Method Used	Prediction	Actual Weather
	Rain Gauge		
	Weather Vane		
	Barometer		
	Anemometer		
	Journal		
	Rain Gauge		
	Weather Vane		
	Barometer		
	Anemometer
